PowerMate II

SweetPro® PowerMate II tubs are designed for essential fortification of stocker cattle, yearling, & cow requirements for vitamins A, D & E, plus protein, calcium, phosphorus and trace elements including selenium. Daily intake will vary depending on forage quality and nutritional needs.

Feeding Instructions:

1. Before feeding SweetPro® PowerMate II tubs for the first time, animals should be well fed.
2. Have one lick tub available per 25 head of beef or dairy cattle.
3. Provide an adequate source of good quality roughage and forage at all times (all they can consume).
4. Provide access to plenty of clean, fresh water at all times
5. Make tubs available in more than one location in large pastures or where more than one water source is available.
6. Other salt and minerals may be provided free choice to balance specific needs.
7. A two week adaptation period will be required to establish a base consumption rate. After adaptation period, recommended range of intake is .75 to 1.25 lbs./hd/ day.
8. If animals consume less than .75 lbs./hd/day transition to SweetPro®PowerMate.

The above feeding directions are general guidelines and will vary with the overall feeding conditions. Always use good management practices.

Caution!

Contains 600 ppm copper. **DO NOT FEED TO SHEEP!**
Do not use in association with another feed containing supplemental selenium.
